SENIOR WEB DEVELOPER

Job-ID: 00170714

Working contract: unlimited
Working hours: full-time (40 hours per week)
Annual salary: 30.000 – 50.000 € (depending on level of experience)
Location: Munich, Germany

Our client is a successful and growing company conducting long-distance transport services by bus in Germany looking for a senior web developer, who can help to build the best-in-class internet platform for their services.

Tasks:
- Strategic and operative development of the existing website containing of a Content-Management-System (CMS) and a web shop
- Optimization and development of modules, new functions and user flows
- Finding innovative and technical excellent solutions to use the website more efficiently
- You are interested in new technologies and try to use them in order to increase the website performance
- Analyzing of existing performance and functions and continual development of these

Profile:
- You have experiences with big Content-Management-Systems, in the best case "Drupal"
- You have a pragmatic approach to find and use innovative technologies
- You love technology and you love the challenge to improve performances
- You are using PHP more often than English and terms as "Scrum" are deeply anchored in your basic vocabulary
- You are passionate, committed and highly proactive

Offering:
- Great opportunity to work in a new environment and to actively shape the future of a new market
- A fast-growing, professional and highly motivated company with flat hierarchies
- Working flexible and independently
- A great working environment with fair payment
- A great team working with you in Munich
